

Students@AI Seoul 2025 by AI Consensus

General Information Document

Event Overview

The **Students@AI Seoul** is an international hackathon backed by the **Responsible Youth Technology Fund** (funded by the **Archewell Foundation** of Prince Harry and Meghan Markle). It convenes **100 participants** from leading global universities (including Minerva University—recognized as the most innovative school by WURI—and top Korean universities). The hackathon focuses on **responsible AI development** by tackling challenges across four broad AI sectors:

- AI in Education,
- AI in Work/workforce,
- AI in Mobility,
- AI in Sustainability.
- Etc. (on request)

We invite partners and sponsors to propose their own challenge statements within these or related AI domains.

Audience:

- **100 participants forming 20+ teams**
 - Including top undergraduate/graduate students, Korean exchange students, and young professionals
 - 20+ nationalities (targeting a global mix of 60% non-Korean / 40% Korean)
 - One team, ideally, consists of five people. The number of total teams should not be over 25.
- **10 industry mentors**
 - 2-3 people from each of the following sectors: project management/marketing/front-end/back-end/etc.

Hackathon Design

- **Mentor Opportunities:** Based on the sector preference, each team can sign up for a session with an experienced mentor to guide them through the challenge.
- **Challenges:** Partners propose AI challenges in one or more of the four broad sectors, or a custom sector.
- **Deliverables:** Teams produce functional software prototypes, design sprints, or feedback reports focused on **responsible** AI usage and solutions.
- **Pitch:** All teams get to pitch for 3 minutes, consisting of a 2-minute presentation and 2 questions of Q&A. Two teams from each sector are selected to give a 10-minute-presentation, with Q&A sessions.
- **Evaluation:** Judges (partners+@) 60% + Mentors 40%.
- **Winners:** Grand Prize of 1,000,000 KRW for one best team. Sector prize of 500,000 for one team in the sector, excluding the grand prize team.

Date	Agenda
Apr 05 (Sat)	Onboarding Day (13:00 - 18:30) @AWS HQ / hybrid [13:00 - 13:15] Opening [13:15 - 13:30] Overall hackathon format explanation [13:30 - 14:00] Research question explanation from partnering companies [14:00 - 14:30] (<i>Glimpse</i>) How to build teams on Glimpse [14:30 - 15:00] Break & networking [15:00 - 15:45] (<i>Upstage</i>) Document Parse API usage [15:45 - 18:00] (<i>AWS</i>) AWS API usage
Apr 06 (Sun) - Apr 11 (Fri)	Team Building + Ideation / online Participants are expected to build teams on Glimpse, and onboard on - -[=AWS's slack channel. PM & marketing mentors will hold online mentoring sessions to provide feedback on the direction of the projects.
Apr 12 (Sat)	Day 1 (10:00 - 18:30) @Elice Lab Seongsu / offline [10:00 - 10:15] Doors open [10:15 - 10:30] Official opening [10:30 - 11:00] Reminder of hackathon format and research questions [11:00 - 11:30] (<i>TBD</i>) Keynote 1 [11:30 - 13:00] (<i>Cry Cheese Burger</i>) Lunch Break [13:00 - 18:00] Sprint + Mentorship sessions [18:00 - 19:30] Dinner break

	[19:30 - 24:00] Sprint + Mentorship sessions
Apr 13 (Sun)	Day 2 (00:00 - 11:00) @Elice Lab Seongsu [00:00 - 07:00] Sprint + Mentorship sessions [07:00 - 08:00] Breakfast break [08:00 - 11:00] Final prototype & presentation submission <u>All materials should be submitted before 11:00</u> [11:00 - 13:30] Individual lunch + transportation to AWS HQ Day 2 (14:00 - 20:00) @AWS HQ [13:30 - 13:45] Doors open [13:45 - 14:00] Greetings to the audience ¹ [14:00 - 14:30] (<i>Gisu Jung</i>) Resume building session [14:30 - 15:50] Pitch round 1 (3 mins for all teams) [15:50 - 16:15] (<i>Upstage</i>) Keynote 2 [16:15 - 18:00] Final pitch (10 mins for 8 teams) [18:00 - 19:30] Snack break + networking [19:30 - 20:30] Award ceremony & Closing remarks [20:30 - 21:00] Close doors

Value proposition

- **Hands-On Experience with Advanced AI:** Tackle problems designed to reflect current and future AI applications. You will gain invaluable hands-on experience by using advanced tools and methodologies that are at the core of AI innovation today.
- **Skill Development and Recognition:** Participate in challenges with opportunities to receive feedback from industry experts.
- **Contribute to Responsible AI Development:** Play a role in shaping the future of AI by advocating for and developing solutions that are ethical and sustainable. Your involvement can help steer the global conversation on responsible AI practices.
- **Join the Global Talent:** Connect with international students from the US's most selective and diverse university to expand their professional and social networks, share ideas, and collaborate on interdisciplinary projects that have real-world implications:
 - 3 time in a row **winners of NASA Hackathon**, CalHacks, and TreeHacks.

¹ The audience (150) will consist of participants (100), judges (10), mentors (10), and the general audience (30; non-participants, upon reservation)

- 187 students from **51 Nationalities** in the most selective (1% acceptance rate) undergraduate program in the United States.
- Completed **65 projects** for organizations, including Google, Microsoft, MIT and Harvard. [*Examples of past projects.*](#)

A detailed offer will be presented after reviewing the Partner's specific preferences.

About AI Consensus:

[AI Consensus](#) is a student organization at [Minerva University](#) and is sponsored by the [RT Youth Power Fund](#), including organizations such as the Omidyar Network and the Archwell Foundation.

Some of our previous accomplishments include:

1. Hosting multiple workshops for over 150 students, educators, and stakeholders in San Francisco, Taipei, London and India to develop consensus and learn from each other.
2. Worked with Minerva University to develop the school's AI policy and AI handbook
3. Organized a [hackathon](#) for use cases of AI in student learning, which reached over 450 participants and received over 150 submissions.
4. Articles: [Students Lead Global Dialogue On Ai in Education](#) ; [Nature: Ready or not, AI is coming to science education — and students have opinions](#)
